# FUTURE

With exponential growth being forecasted for electric vehicles, *now is the time* to invest in alternative charging stations.

*It's the perfect time to embrace the future  
while showing your commitment to sustainability.*

Over the last 20 years, Maldonado-Burkett has become a leader in the transportation industry. As a company committed to sustainability and embracing the future, we are actively working towards expanding the options for EV (Electric Vehicle) Charging. We believe that investing in charging stations is not only essential for the convenience of EV owners but also for the overall growth and sustainability of the transportation industry.

At Maldonado-Burkett, we understand that complex problems require out-of-the-box thinking and a multidisciplinary approach. That's why our team of Certified Technicians, Licensed Electricians and Professional Engineers want to consult with you to provide a tailored turnkey EV Charging solution that meets the unique needs of your business. With new legislation and incentives, the demand for EV Charging stations is growing and our professional team can help guide you through the process from project planning to construction and also charging and payment collection.

We have partnered with one of the most trusted EV Charging manufacturers in the industry. Autel Energy is disrupting the EV Charging industry with their cutting-edge software and a relentless dedication to research and development.

# *Trust us to deliver turnkey solutions*

*that guarantee a seamless project experience.*

## **Site Assessment**

Evaluating feasibility for EV Charging Infrastructure, including power, ADA compliance, environmental planning, utilities, and other factors.

## **Incentive Guidance**

Guidance for incentives and rebates that may make EV Charging infrastructure more cost effective.

## **Custom Solutions Design**

Creating customized solutions that optimize energy production and meet the client's energy goals and budget.

*From the first site visit and assessment through the design and installation, we offer a fully managed service including maintenance and a payment subscription service.*

## **Installation**

Designing and installing EV Charging infrastructure tailored to the specific needs and energy requirements of the client's property.

## **Billing & Operation**

We own and operate the charging network - seamlessly taking care of payments and billing.

## **Maintenance**

Offering regular maintenance services, including cleaning, inspection, and system monitoring to ensure optimal performance. Ensures your system is compliant for future inspections and regulations.
